1866.

Dorchester Antiquarian and Historical Society.

At a meeting of the Dorchester Antiquarian and Historical Society, held in Dorchester, January 18, 1866, the President, Hon. EDMUND P. TILESTON, in the chair, the Librarian having read the record of donations received since the last annual meeting, it was

Voted, unanimously, that the Society publicly express their grateful acknowledgments to the institutions and individuals hereinafter named, for the appropriate and generous donations made by them during the year past, for the increase and enrichment of the library and cabinet of the Society, by which our catalogue of manuscripts, books, pamphlets, maps, engravings, coins, relics and curiosities, has been largely augmented; that is to say:—

To the Commonwealth of Massachusetts, the City of Boston, the Town of Dorchester, the Trustees of the Public Library of New Bedford, the Bunker Hill Monument Association, Hon. G. Washington Warren, Jacob W. Reed, Esq., Eben M. Stone, Benjamin Cushing, M. D., James H. Upham, Thomas Coombs, Esq., *Dorchester, England*, Giles Simmons, Esq., *Dorchester, England*, Hon. Edmund P. Tileston, Samuel A. Greene, M. D., Rev. James H. Means, Thomas Groom, Henry G. Denny, Esq., Edmund J. Baker, Esq., Samuel Blake, Albert C. Clapp, Nathaniel Crane, Daniel C. Baker, Edwin A. Wadleigh, Esq., Rev. Frederick A. Whitney, Ebenezer Clapp, Esq., Alfred H. Sumner, Edward Holden, Samuel B. Pierce, Thomas Waterman, Thomas W. Haskins, Daniel C. Colesworthy, Mrs. ——— Freeman, of New York, Mrs. Thaddeus Clapp, Miss Mary Carlton, Mrs. Ebenezer Clapp, Miss Eliza Dorr, Miss Lydia Lewis, Charles M. S. Churchill, Esq., Hon. James M. Robbins, Nathaniel W. Coffin, James Swan, Nathaniel W. Tileston, William B. Trask.

A true copy of record.

1866.

REPORT OF THE SELECTMEN.

FELLOW-TOWNSMEN:—

The close of another year brings with it to us the duty of submitting the Annual Report of the receipts and expenditures of the town for the year past, with such statements relative thereto as may be explanatory, interesting, or seemingly called for.

The duties which, through the favor of our townsmen, we have been called to perform a second year, we have endeavored to fulfil to the best of our judgment for the interest of the town; and, although in some instances we have expended money in considerable excess of appropriations, in every instance it has been done with the sole intention of promoting the good of the town, after careful consideration, and with the belief that if special town meetings (which we have endeavored to avoid,) had been called, the money we have expended would have been readily voted. The financial condition of the town is, we are happy to say, most flattering to the tax-payers. It will be seen that all the notes which, at the commencement of the last year, were held against the town, overdue, payable on demand, and due in 1865, together with all instalments due, have been met and paid without renewal, and that

the debt of the town is reduced \$61,600. There is also a larger amount of cash on hand in the treasury than at the close of last year, and there is no outstanding note for temporary loan. If no unlooked for event occurs in town affairs, it appears to us that, with the prospect of a considerably smaller State tax the coming year, the rate for taxes must be much less than that of the last year.

SCHOOLS.

The expenditures on account of schools have been less than the amount appropriated and incomes. The income from school funds has been somewhat larger the past year on account of the assiduity of the town treasurer in collecting interest on notes due, some of which had not been collected for a number of years, and also to the investment of moneys not before funded. The Stoughton School Fund has been increased by extra dividends declared by banks in changing from State to National institutions. Very favorable purchases of coal for the town were made at a much less price than the ruling rate has been. The school-house and land on Commercial Street (Maverick,) has been sold to Franklin King, Esq., for \$2,400.

POOR IN THE ALMSHOUSES.

This institution remains under the same superintendence as the last year, and the duties of Mr. and Mrs. Kean have been performed to the entire satisfaction of the overseers. The position Mr. and

Mrs. Kean occupy calls for duties which none can know who have not learned them by actual experience. The real or fancied wants of the aged, helpless, weak-minded, and indigent, who have perhaps seen better days, are many, and the kindness with which those wants have been met by the *superintendents* is worthy of especial praise. The general good health of the inmates the past year, (the expense of physician's attendance at the house having been but ten dollars,) we think shows conclusively that the inmates are carefully provided for. The present number of inmates is twenty; number, February 1, 1865, was fifteen; number admitted during the past year, ten; number discharged, four; died, one. A much larger number of transient persons has been provided with food and lodging the past year than formerly—284. These persons are, in most cases, sent to the establishment by the overseers and by our townspeople, to be taken care of overnight, rather than to feed them at private residences and then allow them to stray into the streets, barns, or some outbuilding, to sleep or perhaps accidentally to set the building on fire in the night. The former is, in our judgment, the proper course to take, as the town can better afford to lodge indigent travellers and beggars than to have them in the streets at night, necessitating a larger night-watch and police force.

The barn connected with this establishment, together with the whole crop of hay secured, was

burned the past season. Much of the latter would have been sold and the proceeds credited to this account. Owing to the necessary expenditures on account of the fire, the cells of the Lock-up have not been altered, as intended.

Among the expenditures will be seen a considerable amount paid for a force-pump and for hose. This pump and hose did much towards saving the carpenter shop and sheds from burning when the barn was burned. By them water can be carried all over the house, and in case of fire they may be of great service.

POOR OUT OF ALMSHOUSE.

The calls for assistance to this unfortunate class of our people have been more than was anticipated. By the operation of the law of 1865, chapter 230, relating to the settlement of persons who have served in the army and navy of the United States, eight widows with their families have been added to the list of persons receiving aid on this account. The extreme unwillingness of the poor of foreign birth to be sent to the State Almshouse at Bridgewater, and their expressed horror of that institution, induced us to visit it, perhaps at an unfavorable time, the superintendent, Mr. Goodspeed, being at the time sick. We are free to confess we are less inclined to send paupers there than before our visit. The duties of Overseers of the Poor require of them sympathy and kindness, and often much firmness; but which of these virtues in justice to exercise, is in many cases hard to determine.

INSANE IN HOSPITALS.

Seven persons are now supported at the different hospitals. New cases the past year, three; discharged from hospitals, two. This unfortunate class of persons cannot be cared for at our almshouse as they require, and the money spent for their board at the hospitals is a pure charity.

HIGHWAYS.

The burning of the barn at the almshouse, in which four horses, a yoke of oxen, harnesses and many tools belonging to this department were lost, thereby necessitating the hiring of nearly all the teams used in the construction and repair of our highways, has caused a great increase in the amount expended. We are now, from experience, convinced that the town can, and did, save nearly twenty-five per cent. in the cost of repairs of highways by owning its teams; the amount of labor performed by hired teams in a given time, is very much less than has been done by the town teams in the same time. Men hired at second hand to labor, do not feel that responsibility or interest in the work that those do who are directly responsible to the town. We do not intend to reflect upon persons employed the past year, but state the facts as we know them. No man can afford to own and support teams to let or hire to the town, without receiving a compensation and profit, and the town can support teams as well and as cheaply as any individual. The amount of labor done upon the highways the past year, we believe has never been exceeded, if it has been nearly equalled. The streets of Dorchester so

much used by heavy teams, and so near to the centre of business, are subjected to more wear than the streets of most towns in our vicinity, and our citizens desire as good, smooth roads as the best. Dorchester Avenue has been graded almost its whole length from Boston line to Milton. The new road from Port Norfolk to Commercial Street, and Commercial Street, both widened and graded. A large amount of work has been done in the vicinity of Hyde Park, and many other streets have been repaired and graded. We think the streets of Dorchester were, at the close of the season, in very good repair. Washington Street will require a good dressing the coming season, as will Boston Street, Hancock Street, and the streets between Dedham line and the Lower Mills village. Although the amount expended upon the highways has been so much in excess of the appropriation, we feel the money was judiciously expended under the circumstances, and the work well done. The heavy teaming from the ledges of Milton and Quincy, and the carrying of so much lumber and coal as is distributed from the wharfs of our enterprising townsmen over our streets, makes it desirable that the very best possible material to be obtained, be used in repairing. We have examined a rock-crushing machine owned by the City of Roxbury, and used in preparing material for the repair of the streets of that city. We are much pleased with it, and think the time will soon come, if it has not already, when our town may with economy own and use a like machine. We understand such machines are in use in Cambridge,

Hartford, New Haven and other places, and give entire satisfaction. The machine crushes the rock so that it is ready to be spread upon the streets, making a material of the very best quality for use, and which will pay to cart a long distance, which is not the case with ordinary gravel.

We ought not to omit to say that we have lowered the grade of Centre Street, in front of the residences of Joseph Dix, C. V. Whitten and I. S. Smith, Esquires, thereby obtaining nearly four thousand loads of excellent material with which to grade other streets. We have paid for material, and to Messrs. Rich for labor in building a new wall for Mr. Smith, \$359.37; to Mr. Payson for building a new wall for Mr. Whitten, \$438; and there will be due Mr. Payson, \$180.66, when the wall is finished. We have received from Mr. Dix, \$250 in labor and cash, for the betterment of his estate by the lowering of the grade of the street. This job, which at one time looked quite formidable, owing to the peculiar character of the road-bed, (being a slate-ledge,) has, we feel sure, been done to the advantage of the town and the abutters.

The track of the horse railroad on Dorchester Avenue, between Centre and Park Streets, has been removed from the middle to the easterly side of the street, and is found to be a great improvement. We have had consultations with the officers of the Metropolitan Railroad Company, relative to their removing in like manner the remainder of the track on Dorchester Avenue; but the financial condition of

the corporation was so strongly urged as an excuse that we did not press the matter. The great convenience of the railroad to so large a number of our citizens, and the very ready disposition manifested by its officers to avoid inconvenience to other travel, while accommodating the patrons of the road, have been pleasing and beneficial to both railroad and traveller. The experiment of using dummy engines upon the tracks has been tried, and from some cause, discontinued upon the Quincy road; these engines are still used upon the Metropolitan road from Park Street to the Mills, and very generally liked by passengers; the objection that they frighten horses, we have heard, but no petition has been presented asking us to order their discontinuance. With really careful engineers and conductors, and, perhaps, with some improvements, it seems to us they may be used with safety to other modes of travel.

FIRE DEPARTMENT.

The expenditures under this head are all made by and under the approval of the Chief Engineer of that department, whose report is herewith presented. The department so necessary for the protection of property, is in a favorable condition, and its members are entitled to the gratitude of the town, and a larger compensation than they now receive.

NOTES AND INTEREST.

The total amount of the indebtedness of the town, February 1, 1865, was \$177,600. The total amount February 1, 1866, is \$116,000.

The termination of payments on account of State aid to soldiers' families in almost every instance, will obviate the necessity of borrowing money, for that purpose, the coming year; while the payment of so large an amount of the debt of the town, will lessen materially the amount of interest to be paid; the amount of the town debt becoming due in 1866, being only \$9,000, against \$48,100 last year. Thanks to a kind Providence and our brave soldiers and sailors, the necessity of raising more money for recruiting purposes no longer exists.

CEMETERIES.

A larger appropriation for the care of cemeteries can with propriety be made. It must be apparent to all that the resting places of the bodies of so many of our ancestors and friends can be made more attractive, and the tablets erected to perpetuate their memories should be repaired and re-set. The wall around the North Cemetery needs repairing, and the fence between the cemetery and the lots on the easterly side should be rebuilt.

LIGHTING STREETS.

A large number of new lamp-posts for street lamps has been erected the past year, and the lamps lighted by the town. The increased number and also the higher price paid for gas have caused the excess of expenditure. As the lamp-posts and lamps are erected without cost to the town, and our streets lighted with only the expense of oil and gas, we

think the increase in number of lights should be encouraged.

POLICE AND WATCHMEN.

We have employed but two night watchmen the past year, and Sunday police have been employed only when absolutely necessary.

INCIDENTAL AND GENERAL REMARKS.

The use of the rooms in J. H. Robinson's building for town offices, has been found very convenient for all having business with the town, and the cost of rent amply repaid in the comfort to all concerned. We have caused the law library and furniture in the offices to be insured. The Town Hall has been cleaned and made as decent as practicable, and may answer for the use of the town for a few years to come.

The reservoir, or rather place from which to obtain water in case of fire, in Draper's Court, Meeting-House Hill, having become entirely out of repair, and the covering so rotten as to be extremely dangerous, we have had it thoroughly rebuilt at a cost of \$594.86, making a never-failing reservoir, eighteen feet across by some ten feet deep, from which water can be obtained when needed. A large amount of fencing has been done the past year; on Dorchester Avenue, near Boston line, on both sides of the avenue at the school pasture lots, on Park Street, Washington and other streets, to save liability to damages. Many culverts made of Burnettized plank have been put

through sidewalks to take the surface drainage from our streets. By an Act of the legislature last winter, the County Commissioners were authorized to rebuild the bridge over Neponset River, known as Granite Bridge, and to put it in order for travel at the expense of the county, after which it was to be kept in repair and maintained at the expense of the towns of Milton and Dorchester. Being desirous of avoiding as much as possible the expense of keeping a wooden bridge in repair, we agreed with the Commissioners that they should build a large proportion of the structure in this town by solid filling within stone abutments, instead of wooden piles, for which we have paid \$900. Only a small portion of the wooden bridge is in Dorchester. The expense of tending the draw in the bridge is equally borne by the towns of Milton and Dorchester. We are assured the cost of the solid structure to the county was much more than the amount we paid therefor. The street leading from Adams Street to the bridge, the Commissioners have named Granite Avenue, and the bridge, Norfolk Bridge. The avenue and bridge are free from toll, and there is now no toll bridge or avenue in Norfolk County.

The walls built to hold the filling in constructing Park Street through the land of Mrs. Walter Baker were thrown down last spring by the action of the frost and the wash of the street; the town thereby became liable for damages both to the owner of the land and its lessee, while the danger to the passengers who travelled over the street was very great. About the same time the heavy bank wall on Neponset

Avenue, opposite the estate of Mr. Mansfield, fell over. Knowing that these walls must be rebuilt, without calling a town meeting for an appropriation, we engaged Mr. George Clapp to rebuild the wall on Neponset Avenue, and Mr. Jeremiah Toomey, those on Park Street. The work has been well done; all the walls which had any appearance of being insecure have been relaid. The expense of material and labor on Neponset Avenue wall, was \$836; that of the Park Street walls, \$1,722.21. A person passing up Park Street at the time repairs were being made, was, it is said, injured by the falling of a derrick used by the workmen, and has commenced an action against the town for damages. We do not consider that he was injured by any defect of the highway, or by any want of care on the part of the town, and think he has no just claim for compensation from the town. The planking on Park Street in front of the building owned by Mr. King, and known as Park Hall, having become rotten and dangerous on the part over the water, we have had a wall built there and filled the street with solid material, at an expense of \$402.45.

The street crossings over the Boston, Hartford and Erie Railroad on Stoughton, Harvard and Norfolk Streets, having become so decidedly dangerous by the caving of the embankments and want of proper protection, and the town having been obliged to pay a bill for damage, we felt it to be for the interest of the town to make an agreement with that company that if they would furnish the gravel necessary, we would cart and spread the same, so as to make the crossings

safe and comfortable, the company to refund to the town the expense incurred, at the rate of twenty-three cents a yard for that put on Stoughton Street crossing, and the cost, whatever it might be on the other two streets. Six thousand six hundred and thirty-six yards were used on the Stoughton Street crossing, costing \$1,526.28. Cost on the other two streets, \$478.50. The bills for this labor have been approved, and we doubt not will be paid the coming season. We knew of no better way in which to manage the affair, wishing to have the streets safe for travel, and to place no unnecessary or avoidable hindrance to the completion and use of the railroad. The stone abutment on the southerly side of Stoughton Street at the railroad crossing, was not built upon the line of the street, and should be rebuilt. We are promised that the bridges on Harvard and Norfolk Streets shall soon be rebuilt, as neither we or the engineer of the railroad, think them strong enough. The sums of \$129.25 paid G. B. Nichols, Esq., of Roxbury, and \$50, paid Mr. George Sumner, of Milton, for injuries received in consequence of the negligence of this corporation, have been refunded to the town by the railroad company.

The amount of \$408.02 has been paid for capping and planking on the side of the new street from Port Norfolk to Commercial Street.

After advertising for proposals to build a barn at the almshouse, forty by fifty feet, to replace the one burned, we contracted with Mr. E. McKechnie to build according to a plan and specifications, for the

sum of \$2,650. The building has been finished entirely to our satisfaction, and is, we think, creditable to the builder and the town. Other bills charged to the fire account, will appear in the statement, among which bills are those for two yoke of oxen which we bought late in the fall, for use in moving stone, &c., this winter. They can be sold at an advanced price, whenever it is thought best to do so.

The town has paid the rent and gas bills for the armory for the Dorchester Rifles, the amount paid to be refunded by the State. A new safe for the preservation of the assessors' records has been bought at a cost of \$600.

The lot of gravel land on Adams Street near the estate of the late John Preston, Esq., being now of little use to the town, we recommend its sale, provided a fair price is offered for it. Owing to the prevalence of the smallpox and varioloid, we, as the Board of Health, employed Dr. J. S. Greene to vaccinate the children of the public schools and others of the town who desired it, at the expense of the town.

There are a number of places in the town, on Adams, Boston, and other streets, where the County Commissioners have at different times ordered the taking of land for the purpose of widening or straightening the streets, and the work has not been done as ordered, for the want of a sufficient appropriation by the town. It seems to us the coming year will be a favorable time to complete the work ordered. The County Commissioners have ordered the street to be widened near the bridge over the Providence Rail-

road, near Hyde Park, the coming spring, and have also laid out a new street from near Paul's Bridge, through a part of Hyde Park near the woollen factory, crossing River Street east of the railroad bridge, and over the hill to Hyde Park Avenue, when a bridge shall have been made by the Boston, Hartford and Erie Railroad Company, so that travel on this new street can pass under said railroad. The building of this street will require a considerable outlay. The Commissioners have also ordered Cottage Street to be widened by taking land of Mr. F. Proctor, and the work is being done. They have also ordered Commercial Street, from Dorchester Avenue to near the steam planing mill, to be widened by taking land of sundry persons; and the work has been done.

Agreeably to the requirements of chapter 45, General Statutes of Massachusetts, we would report that guide-posts with guide-boards upon them for the direction of travellers, are erected in streets and ways within the town, where in our opinion they are necessary. Some guide-boards may need new painting the coming season, many new street signs are needed, and others need to be repaired and painted.

AUDITORS' REPORT.

The undersigned hereby certify that we have examined the accounts of Thomas F. Temple, Treasurer, and find the same correctly cast; and all expenditures and payments are sustained by the necessary vouchers.

There has been received by the Treasurer from all sources the past year, including the balance on hand February 1, 1865, three hundred eighty-six thousand two hundred seventy-four and $\frac{8}{100}$ dollars; and there has been paid from the treasury during the same time, three hundred forty-four thousand six hundred seventeen and $\frac{7.5}{100}$ dollars, leaving in the treasury February 1st, 1866, forty-one thousand six hundred fifty-six and $\frac{3.3}{100}$ dollars, as shown by the above account.

W. F. TEMPLE,
GEORGE HAYNES,

Auditors.

DORCHESTER, February 1st, 1866.

 REPORT OF THE CHIEF ENGINEER.

To the Selectmen of Dorchester :

GENTLEMEN,—I herewith present the seventeenth Annual Report of the condition of the Fire Department of this town, with an account of fires and alarms for the year ending January 31, 1866; also the amount of loss and insurance, as far as has been ascertained; and also the amount of expenditures under the direction of the Board of Engineers for the support of the Fire Department.

After some years of comparative inactivity, the Department has found that the hose and some of the apparatus would not stand the severe trials to which they were liable to be exposed. During the past year, also, the loss of apparatus by the burning of No. 2 Engine-house has compelled the Board to order 660 feet of new hose; this, together with the repairs of the old and the expense incident upon the more than usual number of fires, has caused the excess of expenditure over the appropriation.

Fountain Engine No. 1 has been in the Department more than thirty years: and, notwithstanding it has been rebuilt and repaired, it remains "the same *old* machine," too heavy to be taken to a fire with despatch, too clumsy and too large for an ordinary company to work with

efficiency. The Board deem it throwing money away to attempt to make this engine what it ought to be for the safety of the district in which it is located. The expense for iron work alone on this machine for the past ten years has exceeded three hundred and fifty dollars.

Engine-house No. 2, the engine and all the apparatus connected with it, was destroyed by fire last August. This was a severe loss to the town, as the house and engine were new eight years ago; and but a few months previous to its destruction the house had been improved, the engine newly painted, and everything connected was in the best condition. The citizens of this district have since petitioned the Board of Engineers to furnish them with some means to extinguish fires, and this Board have hired an engine of the city of Charlestown, also furnished it with three hundred feet of leading hose from the other engines belonging to the town. This they think will answer until the town takes further action.

Engine No. 3 has been without a company for some time until the past year, when, upon putting the engine into service, it was found that the wooden stanchions had become so much decayed that they must be replaced by new; also the suction-hose proved unfit for use, and was replaced by new. The engine needs painting; also the house needs a few slight repairs inside.

Engine No. 4 has been revarnished, and some improvements made to the house, so that everything is in good condition, and will cause but very little expense for some time to come.

Engine No. 5 has been painted and put in thorough order the past season, and there is good reason to believe will not need much outlay for some years. The house will need some slight repairs inside. The company has expended fifty dollars on their engine.

Engine No. 6 has been repaired and painted, and some improvements made to the house. Everything connected with this apparatus is in the best condition. The company have expended four hundred dollars upon their house and engine, making it really a beautiful machine and a credit to the town.

The Hook and Ladder is in good and serviceable order.

The several companies in the Department have been prompt and efficient in the discharge of their duties. Their department has been such as to merit the esteem and respect of their fellow-citizens. They have the sincere thanks of the Board of Engineers.

The total amount of expenditures on account of the Department for the past year has been, \$3,958.57, viz.: for repairs, fixtures, &c., \$1,036.26; new hose, \$1,129.93; salaries, \$1,143.75; incidentals, \$648.63.

The Department is organized as follows :

SYLVESTER H. HEBARD, *Chief Engineer.*

Assistant Engineers.

GEORGE G. DENNISON,	HENRY FOBES,
NATHANIEL WITHINGTON,	JAMES T. OLIVER,
THEODORE HERSEY.	

There are now six companies in commission, viz. :

Fountain Co.	No. 1, 37 members,	. Charles F. Hall, <i>Foreman.</i>
Protector Co.	No. 2, 27 "	. Sam'l F. White, "
Torrent Co.	No. 3, 32 "	. J. Foster Hewins, "
Alert Co.	No. 4, 35 "	. John H. Burt, "
Independence Co.	No. 5, 43 "	. Wm. G. Blanchard, "
Tiger Co.	No. 6, 47 "	. Geo. T. Thatcher, "

Mattapan Hook and Ladder, in charge of two persons, Sam'l Bridget, *Steward.*

A table of fires and alarms from February 1, 1865, to February 1, 1866, is annexed.

Respectfully submitted.

SYLVESTER H. HEBARD, *Chief Engineer.*

PHYSICIAN'S REPORT.

Messrs. JAS. H. UPHAM, WM. POPE, and WM. HENRY SWAN, *Selectmen of Dorchester :*

GENTLEMEN,—I have the honor to report that I have visited the several schools in town, as authorized by you, and have vaccinated as follows, viz.,—

At the Adams School,	91	persons.
Mather School,	141	“
Norfolk School,	68	“
Stoughton School,	7	“
Butler School,	21	“
Hyde Park School,	27	“
Washington School,	65	“
Gibson School,	92	“
Winthrop School,	91	“
Bowdoin School,	35	“
Everett School,	102	“
	<hr/>	
Making a total of	740	persons.

Of these, 577 had visible scars from former vaccinations; while 163 presented no such evidence, most of them stating that they had never been vaccinated. Of those who had no scars, 377, or nearly two-thirds, each received one or more—most of them two or three—more or less characteristic vesicles, as a result of the re-vaccination; indicating, it is assumed, that in these cases the protective influence of the first vaccination was more or less incomplete.

Of the 163 upon whom no previous scars were detected, 132 received perfectly formed vaccine vesicles; while of the remaining 31, 18 stated that they had been previously vaccinated, whether successfully or not can only be inferred in the absence of any but negative evidence.

This general result, it is believed, will be regarded as highly satisfactory. The measure thus accomplished cannot but be of great value in protecting the community against the disease, the further progress of which it is thus designed to check.

Respectfully submitted.

JAS. S. GREENE, M. D.

REPORT OF COMMITTEE ON TOWN SEAL.

The Committee chosen at the last April meeting to procure a seal, with a suitable device, as a Corporate Seal of the town of Dorchester, have attended to the duty assigned them, in which they have sought the counsel of their associates, the Dorchester Antiquarian and Historical Society, whose investigations of kindred subjects afforded valuable aid in the promotion of the work with which your Committee were charged. They respectfully submit the following Report :

An examination of the earliest historical references to coats of arms, (upon which seals are based,) proves that they were officially conferred by sovereign princes as a reward for some real or supposed merit on the part of the recipient, and that such arms impressed by a seal upon any document was an evidence of its genuineness, and gave authority and solemnity to the signature.

From coats of arms or seals of individuals came the seals of towns, cities, states and nations.

The device upon a coat of arms was usually symbolic of the fact upon which the implied merit or distinction was founded.

In the United States the sovereignty resides in the people, consequently each individual or association is at liberty to adopt such a device as judgment or fancy may dictate ; but unity of design and aptness of allusion most justly illustrate the principles and laws which govern the ancient science of heraldry.

Your Committee have therefore sought to emblazon upon the Town Seal such a device as would symbolize the acts which rendered the early settlers of this town a peculiar people, and objects of gratitude and veneration by their descendants for all time to come.

The early settlers of Dorchester organized themselves as a church at the New Hospital in Plymouth, England, in March of 1630, prior to their embarkation for this country, which act was pre-eminently the corner-stone of the foundation of this town, although they did not arrive here until early in June of that year. This fact is expressed upon the shield by the rude thatch-roofed church which appears, without a chimney, in the dexter base of the escutcheon.

The free school, the system of which has been exerting a beneficial influence over the whole country, was established in this town in 1639, and said to be the very first free school in the world.

The foundation of this institution is recognized on the shield by the humble thatched-roof building in the lower part of the shield, a little in the rear of the church.

With the liberty, and by grant of land and timber by the town in

1633, Israel Stoughton was induced to build a corn mill upon Neponset River, which was the first water-mill in the colony, if not in the country.

This fact is symbolically noted by the rude mill, with its large wheel which is seen upon the left bank of Neponset River, the course of which river, from its source to its mouth, lay through the ancient territory of Dorchester.

In the back ground will be recognized the Blue Hills which served as a landmark to pilot the early settlers to the mouth of Charles River, and from behind which the rising sun is shining upon a colony who left their homes in the mother country, not as adventurers in search of gold, as exiles, or for conquest, but the more precious boon of religious liberty. The triple-towered castle surmounting the shield, is adopted in respectful memory of Dorchester in Old England, of whose seal this is the principal charge, (in commemoration of that borough having been formerly a Roman fortress,) and from which place the infant colony derived much of its strength, both physically and spiritually.

The motto upon the ribbon, "*Pietate, Literis, Industria,*" signifies that piety, learning and industry were the prominent virtues which the early settlers coveted, and which their descendants unanimously accord to them.

The circle surrounding the shield bears the inscription, "Dorchester, 1630."

Your Committee would recommend that the town now adopt the seal herewith submitted as the Corporate Seal of the town of Dorchester.

BY-LAWS OF THE TOWN.

[Adopted April 8, 1865.]

ARTICLE 1. The regular Town Meetings, held in the months of March and April, and November, shall be called by a warrant issued by the Selectmen, a copy of which shall be posted up in twenty conspicuous places in the town, seven days at least before the time of holding said meeting.

ART. 2. All special Town Meetings shall be called by a Constable leaving a copy of the warrant at the residence of the citizens qualified to vote in town affairs, three days at least before said meeting.

ART. 3. No By-law or Ordinance shall be passed, altered or repealed, and no report of the Selectmen upon the laying out of a high or town way shall be acted upon except at the annual meeting of the Town in the month of March or April.

ART. 4. The Town Treasurer shall not borrow any money in behalf of the Town upon any promissory note executed by him as such Treasurer, unless said note is first countersigned by the Selectmen.

ART. 5. The Town Treasurer shall not pay out any money on account of the Town, except upon a written order from the Selectmen.

ART. 6. Any person described in the 1st section of the 207th chapter of the General Statutes, passed in the year one thousand eight hundred and sixty-two, upon conviction of any offence therein described, shall be punished by a fine not exceeding twenty dollars, or by commitment to such Institution of Instruction, House of Reformation, or other suitable situation, as may be provided by the Town, at the discretion of the Trial Justice having jurisdiction of the case, agreeably to the provisions of said Act.

The Almshouse in this Town is hereby assigned and provided as an institute of instruction, or suitable situation for the purpose mentioned in this By-Law.

ART. 7. No person, except the Surveyors of Highways, in the lawful performance of their duties, and those acting under their orders, shall break or dig up the ground or stones in any street in this town, without first obtaining a written license from the Selectmen therefor, and the

person so licensed shall put, and at all times keep up, a suitable railing or fence around the section or parts of any street so dug or broken up, as long as the same shall be or remain unsafe or inconvenient for travellers, and shall also keep one or more lighted lanterns fixed to such railing or fence, or in some other way exposed, every night, from twilight in the evening through the whole night, as long as such street shall be or remain unsafe or inconvenient for travellers.

ART. 8. No person shall move or assist in moving any building through any street in this Town without first having obtained a written license from the Selectmen therefor.

ART. 9. No person shall ride any horse or drive any horse, or horses, unattached or attached to any carriage, in any of the Streets of this Town, at an immoderate or furious rate, so as to endanger or expose to injury any person being in the same.

ART. 10. No person shall ride or drive unnecessarily on the sidewalks of any street in this Town.

ART. 11. No person shall pasture any cattle or other animals in any of the streets of this Town, either with or without a keeper; provided, that nothing in this ordinance or By-Law shall affect the right of any person to the use of the land within the limits of such street adjoining his own land.

ART. 12. No person shall coast upon East Street, or that part of Washington Street lying south of River Street in this Town.

ART. 13. No person shall kick football, or throw any stones or snow balls, in any of the streets of this Town.

ART. 14. No person shall throw any ashes, filth, waste material or decayed vegetable substance, into any of the streets of this Town.

ART. 15. No person shall behave himself in an indecent or disorderly manner, or use any indecent, profane or insulting language in any of the streets or public places in this Town, or near any dwelling house or other building therein.

ART. 16. No person shall make any indecent figures or write any indecent or obscene words upon any wall, post or building, or in any public place whatever within this Town.

ART. 17. No person shall deface any building, fence, bridge, lamp post, railing, wall, or rock by painting or marking upon it, or by placing upon it by means of any glutinous substance, any advertisement or notice, calling attention to any show or article for sale, unless first getting permission from the owner and one of the Selectmen.

ART. 18. No person shall wilfully and without right, enter into any of the buildings belonging to the Town, and no person shall wilfully and without right take away or cause to be taken away from any engine house or other building belonging to the Town, or in any way maliciously

interfere with any fire engine, hose carriage, ladder carriage, or any hooks, ladders, hose, or other apparatus designed or procured for extinguishing fires, or connected with or belonging to any engine company where said property belongs to the Town. Nothing in this article shall be construed to apply to any felonious or larcenous entry and taking away, or to any case of malicious mischief.

ART. 19. No person shall extinguish any of the street lights of this Town unless having express authority so to do.

ART. 20. Any person who shall offend against any of the provisions of the last fourteen foregoing articles, shall forfeit and for every such offence, a sum not less than one dollar, nor more than twenty dollars, to be paid into the Treasury of this Town. And its hereby made the duty of the several Constables, Police Officers and Night Watch of the Town, to see all the By-Laws of the Town enforced.

ART. 21. No person shall deal in or keep a shop for the purchase, sale, or barter of junk, old metal, or second-hand articles in this Town, without a license therefor from the Selectmen first had and obtained.

ART. 22. By the word "streets," in these By-Laws, it is meant to include all public highways, lanes, courts, bridges, squares, and all places upon which the public have a right to travel.

ART. 23. All existing By-Laws are hereby repealed.

L
